

A NOTE FROM US

Thank you for purchasing some amazing fruit from our family's orchards in Palisade, Colorado! We hope you enjoy your peaches, pears, and/or apples!

It's hard to believe this is our 9th year bringing fruit to the Kansas City area. We are very excited to add tents this year in Liberty and Waldo on the MO side and a new tent on the KS side at Olathe Tint World!

You can stay up to date with current information on preorders, tent locations/dates/times, and recipes/fruit care sheets by visiting us at: <https://www.copeaches4kc.com/>

Please come see us again this season! And if not this season, then we will see you again next year!

If you have any questions or any problems with your fruit/overall experience with us, please let us know.

-Scott, Anna, and the CoPeaches4KC Crew

PROPER PEACH CARE

1. When you first get your box of peaches, sort them as soon as possible to remove the ripest ones. This is a simple process. Remove the lid and survey the top layer for peaches that are bruising. Move those to a convenient place for expedient consumption. Gently feel the rest of the top layer for other soft peaches immediately ready to eat. Separate the ones that are immediately ready to eat from those that are firmer on the top layer.
2. Remove the foam separator between the top and bottom layer and repeat the above actions with the second layer.
3. Then, **REFRIGERATE** softer peaches if they will not be consumed right away and leave the firmer ones out on the countertop to soften up for 24-48 hours. Once the countertop peaches soften up, they should be **REFRIGERATED** as well to reduce the chance of spoilage. As with any fruit, please wash before consuming. Enjoy!
4. If the peaches are sorted properly and **REFRIGERATED**, they can last 10+ days.

Try our peaches at a local business near you!

Many local businesses use our peaches each August/September in various products that they make. Please find them on social media and give them a try this year!
